

Enhance Your Echo Lab Workflow: Increase Reimbursement with **LVivo Seamless™ AI** and **PICOM365**

Now You can Automatically Generate Strain, EF and Right Ventricle Size and Function for all of Your Echo Studies

LVivo Seamless is an AI-based software solution integrated with ScImage's PICOM365 that runs "behind the scenes" on all Echo exams, providing:

Immediate & Reproducible Results
On every echo study in the echo lab.

Auto View Selection & Analysis
Of 3 Apical views generating Global and Segmental Longitudinal Strain (GLS) and Ejection Fraction (EF).

Integrated Workflow
Selected views and results are automatically imported into the PICOM365 viewer and structured reports.

Auto Right Ventricle Analysis
Generates Free Wall Strain (FWS), FAC, and TAPSE in a single click .

Strain Reimbursement
Maximize Strain reimbursements CPT code +93356

Edit Mode
Allow users to easily adjust borders contours, choose different views and/or beats, all in seconds.

Evidence-Based Reporting
PICOM365 auto-generates findings within the customizable structured report.

The Financial Impact

Increase Strain Reimbursements		Increase Scanning Capacity	
Annual Study Volume	18,000	Annual Study Volume	18,000
% Strain Billed Today	10%	Annual Revenue	\$3,744,000
% Strain Billed w/LVivo Seamless	60%	Expected Exam Capacity Increase	+10%
Additional Annual Revenue Expected	+\$237,105	Additional Annual Revenue Capacity	+\$398,111

* Assuming 50% non-facility echo exams.

ScImage's PICOM365 Enterprise Cardiology PACS

PICOM365 is a flexible, scalable and secure solution for any size organization to read, report and exchange imaging data. Deployable in the Cloud, on-premises or as a Hybrid, PICOM365 allows physicians, practices and patients to access any image, anytime from anywhere.

In a complex, data intensive environment like Cardiology, a comprehensive enterprise solution to address ALL imaging disciplines is key. Layered on top of standard image viewing and storage are requirements for data management, workflows, automated intelligent reporting, seamless EHR integration and post-processing transparency.

The correct architecture and solution design to support a single system for ease of use and simple access to the right data provides accurate, consistent and cost-effective cardiac care. The right solution positions your practice for needs today and growth tomorrow.
